**Research Experience for Undergraduates (REU):
Ecosystem Restoration through Interdisciplinary Exchange (ERIE)-REU at University at Buffalo**

Applications are now being accepted for the summer 2015 Ecosystem Restoration through Interdisciplinary Exchange (ERIE) REU at the State University of New York at Buffalo (UB). The ERIE-REU, sponsored by the National Science Foundation, provides the opportunity for undergraduate students to conduct interdisciplinary faculty-mentored research on a diverse array of projects related to ecosystem restoration and engineering for sustainability. REU participants will receive a total of a \$5,000 stipend and on-campus housing in a newly constructed LEED-certified student complex. Participation is limited to U.S. citizens or permanent residents, and students must be enrolled as undergraduate students in a college program through Fall of the following year (graduating seniors are ineligible). Students from underrepresented groups or attending institutions lacking research facilities or opportunities are especially encouraged to apply. Applications must be fully completed by **February 27, 2015**. More information can be found at: http://www.erie.buffalo.edu/REU_apply.php

Hydrofracking Health Risks

Concerned health professionals of WNY have compiled a report of issues related to hydrofracking which is available at <http://concernedhealthny.org/wp-content/uploads/2014/07/CHPNY-Fracking-Compendium.pdf>. The report summarizes research on the risks associated with horizontal hydraulic fracturing for natural gas.

Arctic Methane and Climate Change

With thanks to Michael Patterson for sharing, the Arctic Methane Emergency Group website has an excellent explanation of how planetary warming is affecting methane release in the Arctic. As this region is warming more rapidly than more temperate and tropical regions, we need to understand the consequences. Visit <http://ameg.me/index.php/methane> for graphs and more information.

Holiday lights: consider seasonal light emitting diode, or LED, strings of lights. These can save up to 95 percent less energy than conventional bulbs, and they last seven times longer than traditional bulbs thereby resulting in lower power consumption.

Be financially responsible: Overspending during the holidays will not only increase your stress now, but will leave you feeling anxious for months afterward as you struggle to pay the bills. Step back from the excessive gift-giving and practice simplicity, creativity and basic human kindness.

Going green when planning gifts: When you gift also means that you have taken the time to consider the environment and have given a gift that shows something special about you. You will have created a ripple effect too significant to calculate.

Create a gift from scratch: Making a personal effort to create something is always appreciated. Be conscious of the materials you choose and create something to show that you care. Picture frames and mirrors are perennial favorites and people tend to keep them. Reprint a favorite family photo and have it framed. Compose a song, write a poem, or knit a scarf for the one you love. Make the wrapping part of the gift: a decorative canvas bag can hold gifts and be reused for grocery shopping.

Buy a thoughtful gift

Houseplants or a live organic herb garden are

calendar printed on 100% recycled paper with daily affirmations and uplifting quotes. These will remain with the person for a year at least, and can make a difference every day. Open a savings account or buy a stock for a child in your family and teach him/her how it grows.

Consider a stress-reducing present: Buy your best friend a gift certificate for a one-hour massage or a yoga lesson. Give gift coupons for a car wash or a movie. A subscription to the theater or gym is also an excellent alternative to packaged material gifts. A book, CD or DVD can make a fantastic present especially when the content is uplifting.

Give to a charity: Transfer your gift-giving energy towards buying toys for local children through [Toys for Tots](#), or by donating items to your local food pantry. Buy cards that donate a portion of proceeds to a good cause like UNICEF.

Holiday Cards: The 2.6 billion non-recyclable holiday cards sold each year in the United States could fill a landfill the size of a football field 10 stories high. Buying cards printed on recycled paper could help reduce that pile. Does the holiday have you feeling depressed? Help others, not because you should, but because it is the best remedy to seasonal sadness. Find someone who is struggling more than you are, lend them a helping hand, and remember **Jesus is the reason for the season!**
